

Billions of people
worldwide rely on
AccuWeather to help
them make the best
weather-impacted
decisions and get
more from their day.

We have kept millions of
people safe when severe
weather has threatened,
reduced bodily injury
and prevented hundreds
of billions of dollars in
property damage.

A person is silhouetted against a bright window, holding a large black umbrella. The scene is set in the rain, with water visible on the ground and a string of warm-toned lights hanging in the background. The overall mood is contemplative and serene.

A Legacy of Leadership

Since its establishment in 1962, the AccuWeather story, and that of Dr. Joel N. Myers, our Founder and CEO, have represented great scientific application, innovation, creativity, and entrepreneurship to revolutionize the field of weather forecasting.

Believing I could help businesses, government agencies and the public operate more effectively by providing customized forecasts that were more accurate and more precise than what was available from free sources, I faced unimaginable headwinds and challenges in my quest to establish AccuWeather as a healthy and profitable company.

Dr. Joel N. Myers

Founder, CEO & Chairman

Proven Superior Accuracy™

Today, AccuWeather is the most used source of weather forecasts and warnings in the world, proven and verified to be most accurate. Study after study of weather forecast accuracy has confirmed statistically the superiority of AccuWeather forecasts over all other sources.

Accuracy+Weather = AccuWeather

Beyond Superior Accuracy[™]

The superior value of AccuWeather forecasts goes beyond statistical superiority. It is achieved through our finely tuned art and science of prediction, using the proper wording, focusing on the weather's impact and the psychology of how the forecast will be interpreted so people take the right action.

AccuWeather's extraordinary level of Superior Accuracy[™] is achieved by a combination of the best and latest technology, patented processes, and by the drive and dedication of the most talented computer specialists, product developers and weather forecasters in the world working together in a unique crucible of excellence.

AccuWeather is the #1 weather source in the world, reaching people on every media and digital media platform

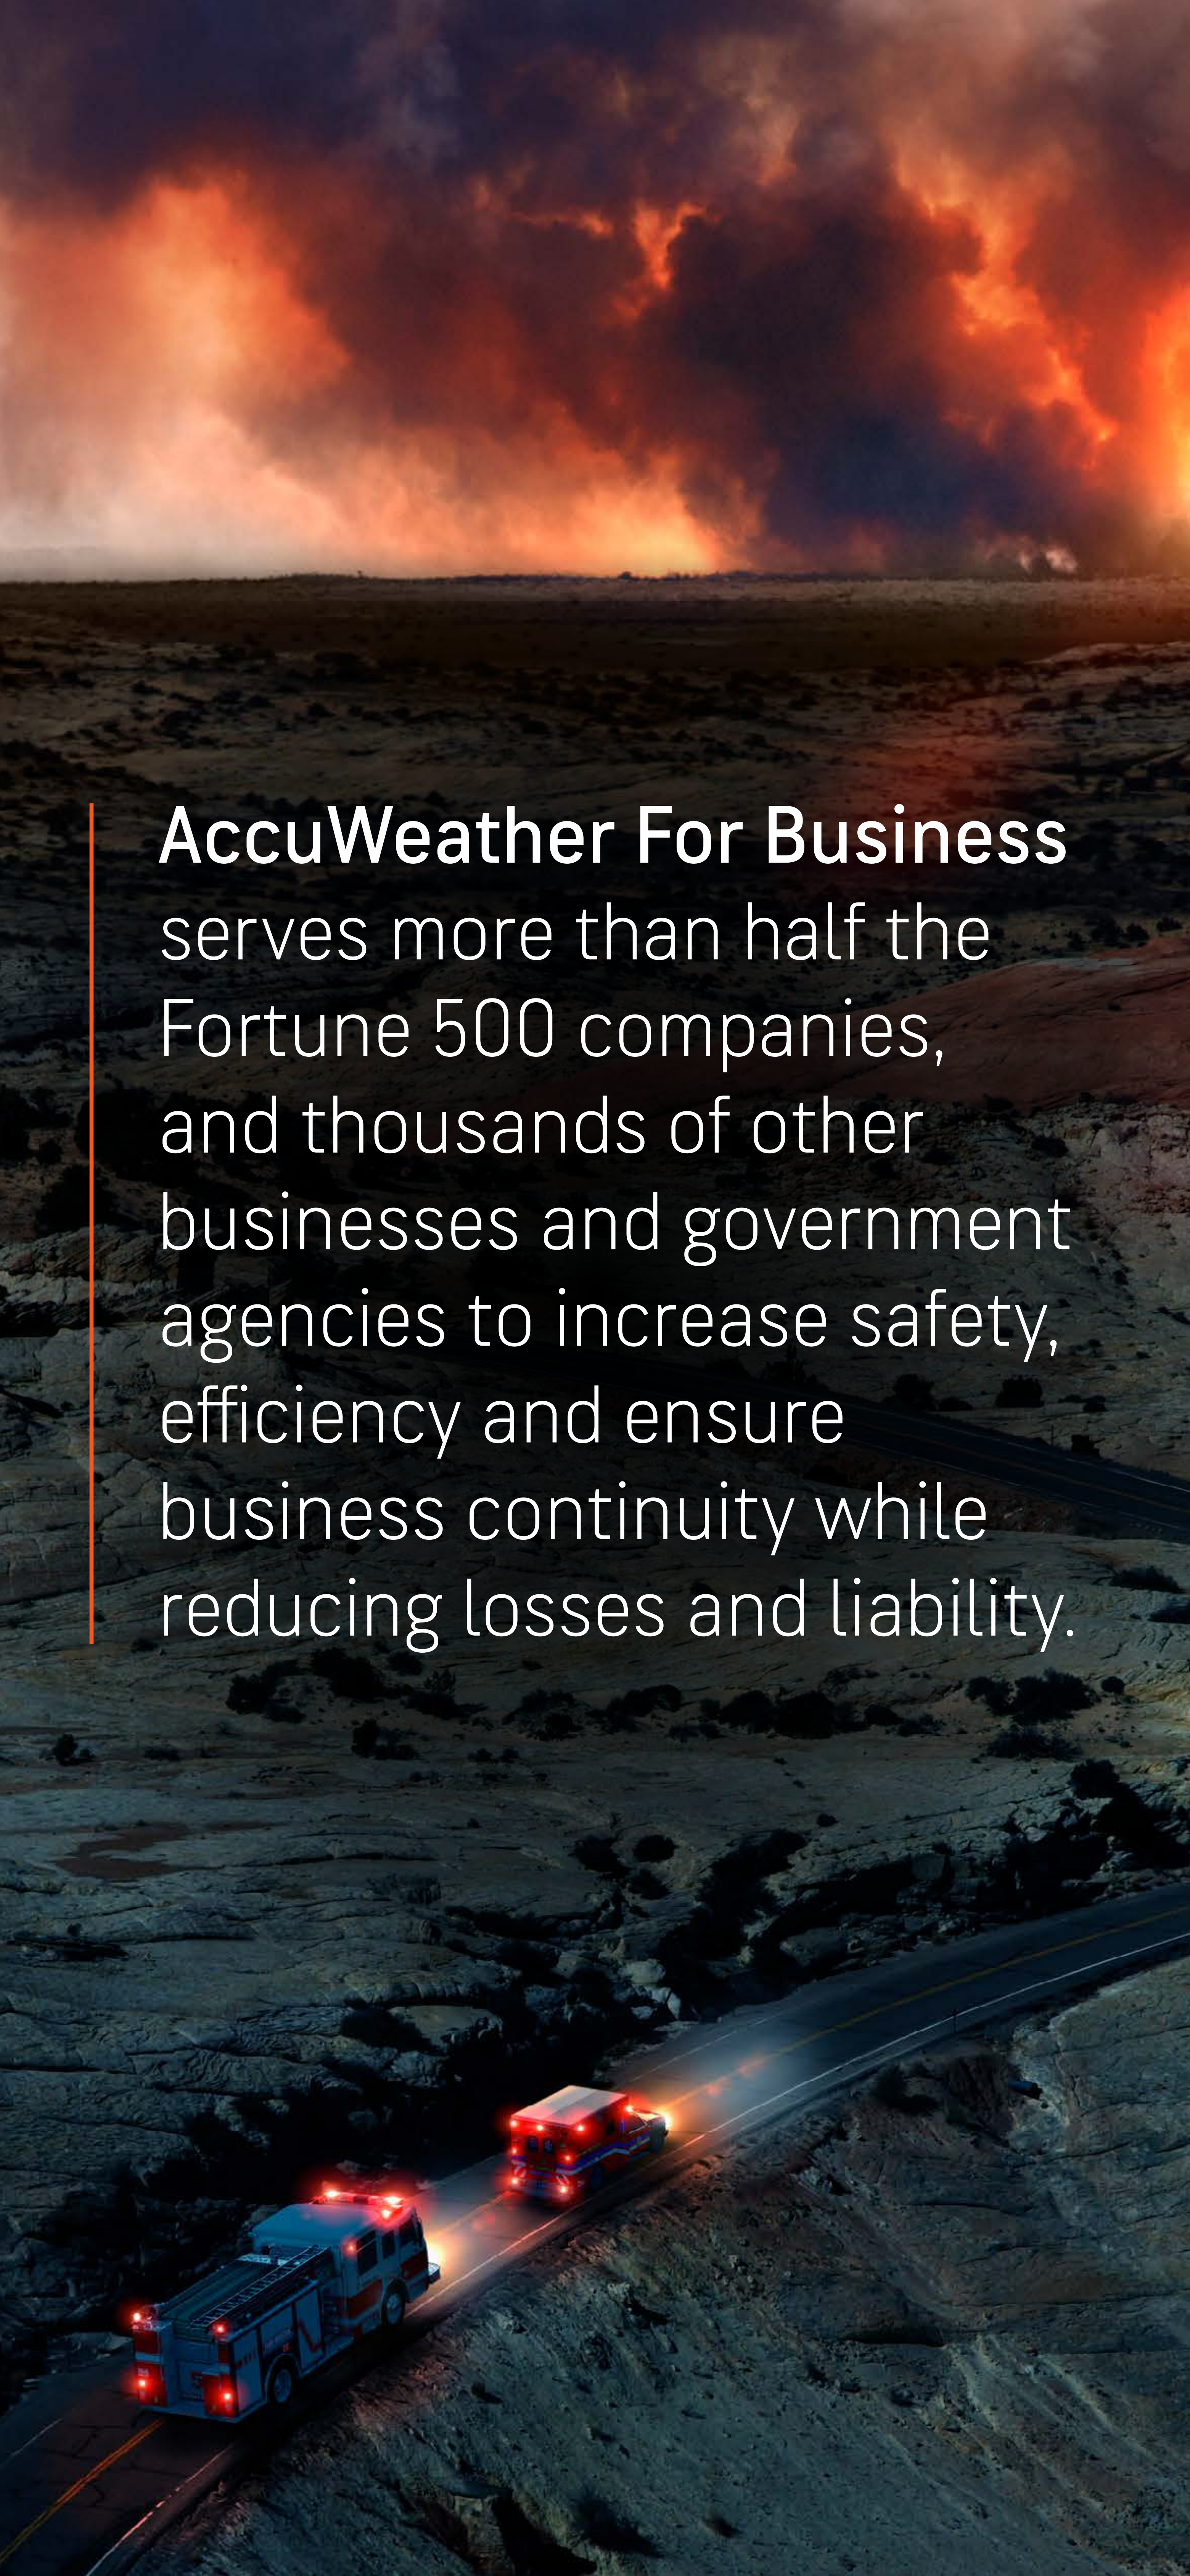

As technology evolves, AccuWeather evolves. New platforms continue to emerge for user consumption, and, true to our legacy, we continue to innovate in delivering and communicating the most actionable and most accurate weather forecasts that provide superior value to our users over all other weather sources.

Multi-platform reach

Our forecasts are seen and heard daily on thousands of digital signs, 800 radio stations and in 700 newspapers. Also, we serve 100 television stations.

The AccuWeather TV Network reaches 35 million households, and our streaming service is available to more than 200 million active users on platforms, such as Roku, Xumo, LG and Amazon Freevee.

AccuWeather For Business
serves more than half the
Fortune 500 companies,
and thousands of other
businesses and government
agencies to increase safety,
efficiency and ensure
business continuity while
reducing losses and liability.
